## FEATURES

•Compact size, slim design, light weight

• High efficiency, low temperature rise

• Protections: Protections: short circuit, overload, over temperature

• Cooling by free air convection

• Compliance to worldwide regulations for lighting

• IP20 protection

• 5 years warranty

| SPECIFICATION |                             | PFV-30-12-B                    | PFV-30-24-B |
|---------------|-----------------------------|--------------------------------|-------------|
| OUTPUT        | DC Voltage                  | 12V                            | 24V         |
|               | Rated Current               | 2.5A                           | 1.25A       |
|               | Current Range               | 0 ÷ 2.5A                       | 0 ÷ 1.25A   |
|               | Rated Power                 | 30W                            |             |
|               | Line Regulation             | ± 3%                           |             |
|               | Load Regulation             | ± 3%                           |             |
|               | Setup, Rise Time (note 4.)  | <1s, 100ms/230VAC at full load |             |
|               | Hold up time                | 10ms/230V at full load         |             |
|               | Ripple & Noise (note 2.)    | < 500mVp-p                     |             |
|               | Voltage Tolerance (note 3.) | ± 5%                           |             |
| INPUT         | Voltage Range               | 198-264VAC                     |             |
|               | Frequency Range             | 47 ÷ 63Hz                      |             |
|               | Power factor (Typ.)         | ≥0.9                           |             |
|               | Efficiency (Typ.)           | 82%                            |             |
|               | AC Current (Typ.)           | 0.4A/220-240VAC                |             |
|               | Inrush Current(Typ.)        | 40A/220-240VAC                 |             |
|               | Leakage Current             | < 0.5mA/240VAC                 |             |
|               | No Load Power Consumption   | ≤0.5W                          |             |

## NOTE:

1. All parameters NOT specially mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature.

2. Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a  $0.1\mu$ F i  $47\mu$ F parallel capacitor.

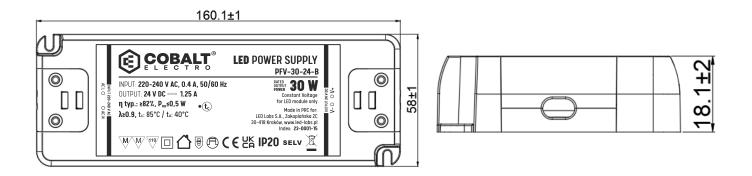

3. Tolerance includes set up tolerance, line regulation and load regulation.

4. Length of set up time is measured at first cold start. Turning ON/OFF the power supply may lead to increase of the set up time.

5. The power supply is considered as a component that will be operated in combination with final equipment. Since EMC performance will be affected by the complete installation, the final equipment manufacturers must re-qualify EMC Directive on the complete installation again.
